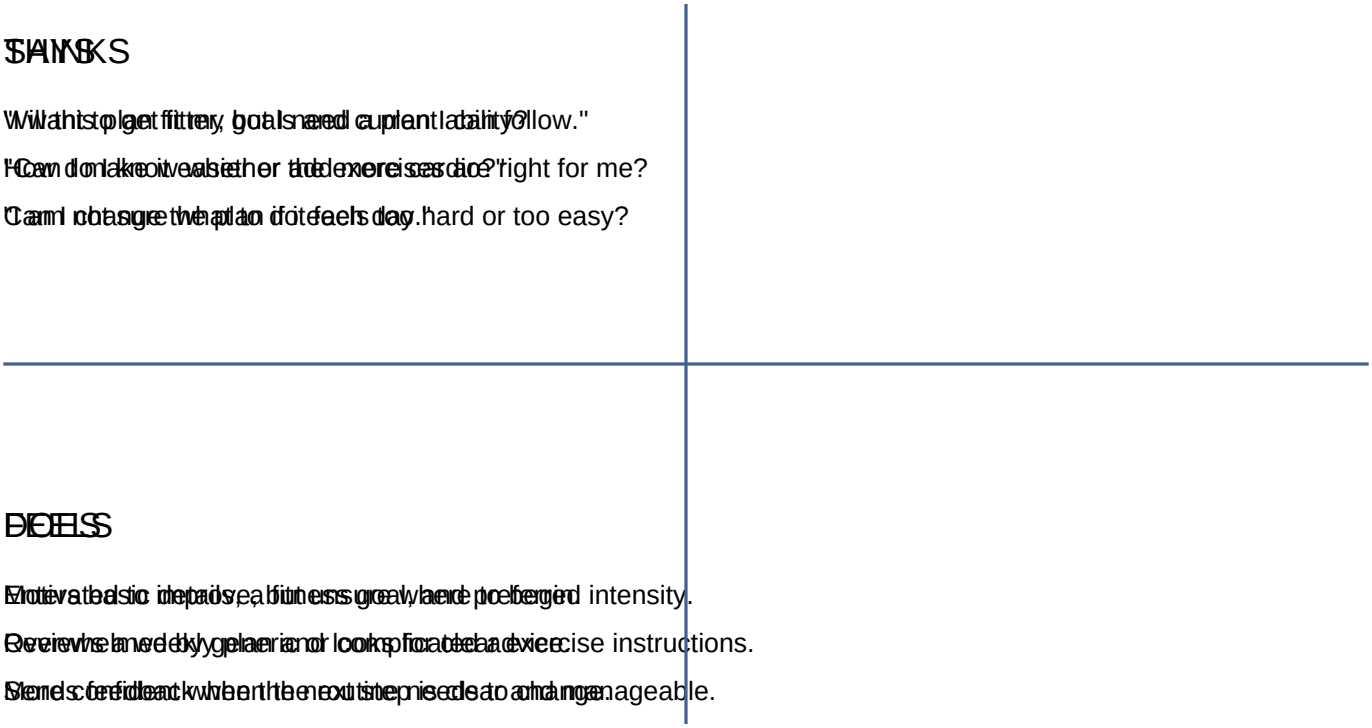
FitBuddy

Empathy Map

Brainstorming and ideation | Primary user: someone starting or maintaining a fitness routine



NEEDS

A simple starting routine matched to the stated goal and intensity.

Clear daily instructions, rest/recovery guidance, and an easy way to refine.

Respectful, non-judgmental language and reminders to adapt to personal limits.

IDEATION INSIGHTS

Prioritize a short input form, readable 7-day plan, and feedback-based updates.

Keep tips concise. Ask about limitations before suggesting exercise, and make clear that AI suggestions are general guidance that may need personal adjustment.

Persona is an ideation assumption based on the FitBuddy project brief, not user research.
